

ACCELERATOR

SERVICE 02

# Document Intelligence

Your engineers waste hours every week searching for documents across disconnected systems. We fix the findability problem using the Microsoft tools you already own.

## 6-8 Wks

TO PRODUCTION

## 15-20 Hrs

INDUSTRY AVG. SEARCH TIME SAVED / WEEK

## M365

BUILT ON YOUR STACK

### THE PROBLEM

In AEC and manufacturing, critical knowledge lives in specs, drawings, and SOPs scattered across SharePoint, file shares, and email. Your highest-paid people spend more time searching than engineering.

### WHAT WE BUILD

## Intelligent document infrastructure

- Document taxonomy & governance
- Azure AI Search with semantic ranking
- SharePoint / M365 optimization
- Natural-language search interface
- Automated classification & tagging
- Training and adoption support

### PRE-BUILT ACCELERATORS

#### Document Intelligence Engine

Pre-built OCR, classification, and extraction pipeline. Handles contracts, specs, and compliance docs.

#### Intelligent Search Framework

Production-ready semantic search and RAG system. Connects to SharePoint and document repositories.

## Why Ryshe

### AEC & Manufacturing Focus

We understand specs, submittals, RFIs, and SOPs because our parent company lives in this world.

### Production Systems, Not Demos

Every deployment includes governance, training, and adoption support. Not a POC that dies.

### Microsoft-Native Expertise

Azure AI Search, SharePoint, M365 Copilot -- built on the stack your team already knows.

### 125 Years of Engineering Heritage

Wiley|Wilson's century-plus reputation for solving real engineering problems.

*Not sure your data is ready? Start with our AI Readiness Assessment (\$10K, 2 weeks).*

### See It On Your Documents

We demo on your actual documents, not sample data. 30 minutes, real results, no prep required.
