

SERVICE 03

AI-Ready Data Foundations

Your AI initiative will fail without clean, governed data. We build the foundation: unified pipelines, governance frameworks, and single-source-of-truth architecture on Microsoft Fabric and Azure.

8-16 Wks

TYPICAL TIMELINE

60-80%

OF AI FAILURES ARE DATA PROBLEMS

Fabric

MICROSOFT DATA PLATFORM

THE REALITY

If your team argues about which numbers are right, you have a data problem. No AI model produces trustworthy outputs from untrustworthy inputs. Most firms skip this step. That's why most AI projects fail.

WHAT WE DELIVER

The data layer AI requires

- Data pipeline architecture
- Governance & data quality controls
- Fabric / Azure platform deployment
- Data cataloging & lineage tracking
- Single-source-of-truth architecture
- Migration from legacy sources

HOW IT WORKS

01

Discover

Audit every data source. Map what exists and what's missing.

02

Architect

Design the target state: unified pipelines and governance.

03

Build

Phased 4-week sprints. Working infrastructure at every milestone.

04

Transfer

Your team owns it. Full docs, training, and 30-day support.

Why Ryshe

Data Engineering Depth

Our architects have built enterprise data platforms at Fortune 500 scale. Not theorists.

Foundation-First Philosophy

We won't sell you AI until your data can support it. That honesty saves you six figures.

Microsoft Fabric & Azure Specialists

Deep expertise in the Microsoft data stack your organization is already invested in.

125 Years of Engineering Heritage

Wiley|Wilson's reputation means we build infrastructure that lasts, not quick fixes.

Not sure where you stand? Start with our AI Readiness Assessment (\$10K, 2 weeks).

Your Data Is the Bottleneck

Every week you delay costs your AI roadmap months. Let's find out where you actually stand.
