

SERVICE 04

Intelligent Automation & AI Agents

Custom AI agents and automated workflows that eliminate manual work. Built on Azure AI and the Microsoft stack you already own. Production systems that run without us.

6-12 Wks

TYPICAL TIMELINE

AI Foundry

AZURE AI AGENT FRAMEWORK

100%

YOU OWN THE IP

WHAT WE BUILD

Production AI systems, not prototypes

- Custom AI agents on your data
- Azure AI Agent Service workflows
- Intelligent document processing
- Copilots for internal knowledge
- AI Foundry integration & deploy
- Production deploy & monitoring

PRE-BUILT ACCELERATORS

Predictive Analytics

Forecasting and anomaly detection with data connectors and dashboards.

Conversational AI

Production chatbot with knowledge connectors and conversation flows.

Computer Vision

Inspection, detection, and safety models for manufacturing and construction.

EXAMPLE USE CASES

- Automated compliance documentation
- AI-driven maintenance scheduling
- Service request routing & triage
- Copilots for company SOPs & policies

Why Ryshe

Production-Grade Engineering

We deploy systems that run in production with monitoring, not POCs that sit on a shelf.

You Own Everything

100% IP ownership. Full documentation. Your team can run it without us on day one.

Azure AI & Foundry Specialists

Deep expertise in AI Foundry, Azure AI Agent Service, and the full Microsoft AI platform.

125 Years of Engineering Heritage

Wiley|Wilson's century-plus track record of building systems that work under real conditions.

AI agents fail without clean data. Start with our AI Readiness Assessment or Data Foundations engagement first.

Ready to Automate?

Every engagement starts with understanding your workflows. If your foundation isn't ready, we'll tell you.
